FIG LANDING MATS

These top quality mats are mainly used where high performance is needed, not only in training but also in competitions. The core is made from 6 layers of highly durable polyurethane and polyethylene foam, which ensures good surface memory return.
The edges have foam stabilisers to prevent defl ection. The base cover is made of phthalate-free Belgian leather mesh (anti-slip) with a mesh air vent around the perimeter of the entire mat to prevent the formation of cracks in the polyurethane, which would shorten the life of the mat.
On the surface, sewn around the perimeter is 10 cm soft velcro for the interconnection of mats.
