Gymnastic carpets

We are one of a few companies that have developed the production of gymnastic carpets, this product is comparable to the top products abroad but our price is much lower than the price of our competitors. The core is made of multilayer crosslinked polyethylene and the carpet we use has a unique feature – there is no fraying at the joins (even after repeated joining of two carpets together by Velcro). This carpet is also used as a run-up track to the gymnastic equipment. To prevent sliding the carpet has a softer layer at the bottom.
