

Children beam light

These beams are designed primarily for children and beginners. The width of the training area is 15 cm.

The trainee gains certainty in these ranges before going to the big pillars. They are also suitable for training new complex elements. It is made of soft foam materials, the upper layer is a gymnastic carpet.

The bottom layer is made of special antismie. The

hammer is very light and easy to carry. It is designed for use in smaller capacity spaces. Its storage is unpretentious.
