Low Training Horizontal Bar 200cm

A robust gymnastics horizontal bar designed primarily for children and young gymnasts. Featuring height adjustment in 5 cm increments up to a maximum of 200 cm, a heavy-duty steel frame, and secure floor anchoring with 16 bolts, this training apparatus provides a stable foundation for everyday gymnastics practice.

The DIONY SPORTS Low Training Horizontal Bar is specifically designed for gymnastics training and skill development among children and young athletes. It is ideal for gymnastics clubs, sports associations, schools, and professional training facilities.

The foundation of the apparatus is an exceptionally robust steel structure with two independent uprights, securely anchored to the floor. Each upright is fixed using 8 anchor bolts, providing a total of 16 anchoring points for the entire structure. This design contributes to excellent stability and rigidity during gymnastics training.

The height of the horizontal bar can be adjusted in precise 5 cm increments, up to a maximum height of 200 cm. This allows coaches to adapt the apparatus to the age, height, and skill level of individual gymnasts.

With an overall width of 240 cm, the structure provides sufficient space for gymnastics exercises and coach-assisted training. Its design eliminates the need for external tension cables, allowing efficient use of gym space and unobstructed access to the apparatus.

Key Features

Heavy-duty steel construction – excellent strength, rigidity, and durability.
Secure floor anchoring – each upright is fixed with 8 bolts, providing a total of 16 anchoring points.
Precise height adjustment – horizontal bar height adjustable in 5 cm increments.
Maximum bar height of 200 cm – ideal for children's gymnastics training.
240 cm overall width – ample space for exercises and coach assistance.
Cable-free design – compact construction with easy access from all sides.
Professional training equipment – suitable for intensive daily gymnastics practice.
