Carpet mats

This patented system of the mats with double-sided gymnastic carpet forms the perfect plane in every gym. The whole system is designed in two versions. Harder - for competition purposes and softer - for training purposes. The main advantage of the carpet is that it holds (keep)the magnesium on it and reduces of the whirling of the magnesium in gym. Thanks to the connection underside of the carpet and the system of Velcro on the mats is perfect to lock the mats without paws and at the same time to eliminate any dilation between each mats. The carpet is placed on each mat in the largest possible strips. For easier handling we recommend a maximum strip-length of 6 m. This technology is the perfect solution for any gym even for competitive use. Each connections between the carpets are taped up the both sides Velcro in the carpet color.
