Exercise floor band

The fl oor exercise strip has identical features to the classic exercise fl oor. It is used where there is a need for space saving. It has dimensions of 2m wide x 20cm thick with various lengths available. In order to prevent the unwanted lifting or defl ection at the edge of the fl oor strip, both longitudinal sides have stabilisers installed.
The strip cannot be use to form the classic square 14 m x 14 m fl oor area due to these edge stabilisers. You can choose soft or hard edge options, according to your preference by adding or removing 4 springs, which are included. To avoid sliding on hard fl oors we recommend using a tensioning anchorage system. These tensioners are not included.
