Safety blocks for beam

The beam safety blocks form a system of polyurethane and polyethylene foams to support learning gymnastics skills. The set contains five sections: 1 × 214 × 200 × 14 cm, 2 × 200 × 100 × 30 cm and 2 × 200 × 100 × 60 cm. Sections connect using hook-and-loop fasteners.

Removing sections and lowering the beam accordingly allows the overall height to be adjusted, for example for beginners. The upper layer combines firmer polyurethane and polyethylene to reduce the difference in firmness between the beam and the surrounding area.
