Pits

The impact pit is made with the expertise of safety professionals. Our portfolio includes a wide range of impact systems, from classic polyurethane cubes to special foam, which is covered with a stretchy fabric.
We work closely with the customer to ensure needs are met, a 3D image is produced (similar to the process of creating a whole gymnastic gym) and then construction commences once plans are agreed. The sewing of parts is carried out directly in the gym.
The price of individual systems depends on the volume of materials and processing demands.
