Children beam

The children's beam is designed for children, beginners and learning new gymnastics skills. The exercise surface is 15 cm wide. The construction uses soft foam materials, with a top layer of similar firmness to a conventional beam. Its low weight makes carrying easier.

Side hook-and-loop straps attach the beam to a gymnastics carpet. Fastening these straps to the matching underside creates an anti-slip base for use on mats or parquet floors.

Product number	Size	Weight	Color
