Stretch landing area

This landing area is suitable where the standard pit is not possible to install. Due to its weight (about 60 kg - depending on the size) it is easy to move. The sandwich-type core has special modifications, providing better safety for the gymnast. The stretch material on the surface allows the landing area to return to its original position allowing the gymnasts to feel confident to land on it during more complicated exercises. The customer can choose softer or harder side of that area. This simple act is done on-site. We are able to produce any size on customer´s request.
