Children beam

These beams are designed primarily for children and beginners. It has a width of 15 cm and helps the gymnasts become confident before they go to the bigger sized beam. They are also suitable to practise new or more complicated moves. They are made of soft foam but the upper layer is made from similar material (similar hardness) as a classical beam. They can be moved easily, even by a small child. There is velcro on the side of the beam to fix it onto the carpet. If velcro is fixed to the bottom of the beam, an anti-slip base is created, then this piece of equipment can be used on the mats or flooring.

Product number	Size	Weight	Color
G3-30025158-R	**300x25x15/8cm**	3kg	
G3-30025158-G	**300x25x15/8cm**	3kg
